

Pioneers

Help us build Earth's most customer-centric company.

Amazon Web Services has countless opportunities for Software Development Engineering talent at our Amazon headquarters in Seattle, WA. Within all of our teams, you will be encouraged to see the big picture, be creative, and positively impact millions of customers.

There are opportunities to work on global features for our AWS Platform and AWS Database Services teams.

Amazon...a place where builders can build. We hire the world's brightest minds and offer them an environment in which they can invent and innovate to improve the experience for our customers. Many of the problems we face have no text-book solution, and so we -happily-invent new ones

- Jeff Bezos, 2010 Shareholder letter.

What is AWS?

In 2006, Amazon Web Services (AWS) began offering IT infrastructure services to businesses in the form of web services -- now commonly known as cloud computing. One of the key benefits of cloud computing is the opportunity to replace up-front capital infrastructure expenses with low variable costs that scale with your business. With the Cloud, businesses no longer need to plan for and procure servers and other IT infrastructure weeks or months in advance. Instead, they can instantly spin up hundreds or thousands of servers in minutes and deliver results faster.

Today, Amazon Web Services provides a highly reliable, scalable, low-cost infrastructure platform in the cloud that powers hundreds of thousands of businesses in 190 countries around the world.

The Jobs

Key Technologies we Use: Java, C++, Linux/UNIX, Amazon Web Services, OO design, algorithms, data structures, distributed systems

Software Development Engineers – AWS Platform

The AWS Platform team creates software components that are fundamental building blocks used by all teams within AWS to build their services upon and run their businesses; everything from Identity and Access Management to billing, account management, payments, data/intelligence services, cryptography, and fraud protection.

In a friendly, intellectual and team-oriented atmosphere, we run projects in small autonomous teams which lead to many learning opportunities, independent work and significant ownership. We have the “best-of-both-worlds” scenario of a startup atmosphere combined with the resources of a large company. We’re looking for talented problem solvers who’d jump at the chance to have their products used by developers all over the world. We want you to be a part of a team that is making history at Amazon.

Software Development Engineers – AWS Database Services

In AWS Database Services, our mission is to provide customers with best-in-class data services in the cloud, in order to store, query, and analyze enormous datasets. We do this by providing fully-managed relational and NoSQL database services, as well as in-memory caching as a service and a petabyte-scale data-warehouse solution. We pioneered Amazon RDS, Amazon DynamoDB, Amazon Redshift, and Amazon ElastiCache. Each service changed the course of database history by bringing new and innovative features to our customers.

We’re looking for developers with expertise and passion in solving difficult problems in distributed systems, high-performance storage systems, data visualization, query generators, and database internals - experience with parallel query processing, distributed caching, business intelligence, or transaction processing are all big pluses. If this is you, Database Services is a unique place where you can design and build innovative technologies in a very large distributed computing and analytical environment, and help lead fundamental changes in the industry.

Relocation

If you're successful, Amazon will help with relocation costs for you and your family. We have partnered with a world-class relocation service provider to make sure your relocation is as stress-free as possible. Our service provider will assist you with real-estate and destination services to find the best fit for you.

South Lake Union

South Lake Union (SLU) is home to Amazon's uniquely urban campus, offering something for everyone.

EAT

Sure, we've got popular and award-winning restaurants, bars, and shops all around the city, but did you know there is *also* an incredible food truck scene?

STAY

South Lake Union is one of the fastest growing and most vibrant neighborhoods in Seattle. As the city's downtown lakefront neighborhood, it's a place where cutting-edge companies co-exist with urban lofts. One-of-kind retail experiences mix with world-class parks and open spaces. Seaplane tours depart to circle scenic Seattle from above, and a streetcar line quickly moves people around in style.

PLAY

Seattle is known for being a very active city. With tons of great trails, lakes, and mountains surrounding us, there is something for everyone. When the weather is clear, you'll find everyone out and enjoying the sunshine.
